

UV-C LED Light Bard
Part Number: SPCBD-S121-03

Features

- 18 UV-C (275nm) LEDs
- Perfect for HVAC or commercial UV light disinfecting / sanitizing
- Better than fluorescent bulbs that typically only last a year!
- Standard 2.1mm 24VDC barrel jack input
- Can be rail or fastener mounted
- Minimal current draw ~240mA
- We can customize for your application if needed.
- RoHS Compliant
- Made in USA
- Operating Temperature:
-25°C to 85°C

Applications

- HVAC systems / commercial equipment
- Equipment that currently uses fluorescent bulbs

Description

The SPCBD-S121-03 is a long-life alternative to fluorescent UV bulb systems. The LEDs generate a 275nm UV-C wavelength that disinfect and sanitize surfaces and environments. Fluorescent UV bulbs are not only expensive but typically last a year before needing replaced, this product will last much long which saves money long-term.
